Leo Vinzenz?

A mixture of geek and economist runs through my personality. This results in an insatiable thirst to understand new technologies at the bit and byte level and to relate them to current market developments. I always prefer a discussion about the sociological consequences of artificial intelligence to a bar evening, which did not impede the development of my outstanding interpersonal skills.

Working experience

03/2018 – 06/2018
Project study at Schmitt und Sohn in Nürnberg
- Inventory of the degree of digitisation and development of digitisation strategies
- Recommendation for the management to digitize 40,000 elevator installations

01/2017 – 12/2017
Working student personnel- / IT-department Schmitt und Sohn in Nürnberg
- Planning, implementation, evaluation and presentation of the employee survey of 1600 employees (personnel responsibility for 5 trainees)
- Planning and implementation of a Germany-wide eLearning platform for decentralized technician training with Moodle
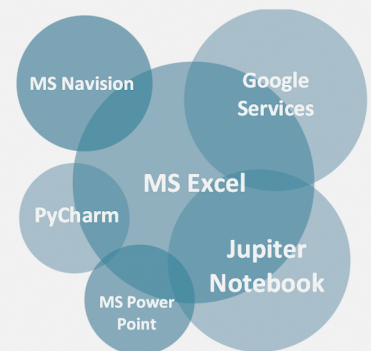

10/2015 – 12/2016
Working student sales and customer support Schmitt und Sohn Munich
- *Sales support and project support from the tender to the commissioning of elevator systems*
- *Acceptance of malfunctions in customer talks and technician coordination for troubleshooting*
